

Aerodag® CERAMISHIELD™

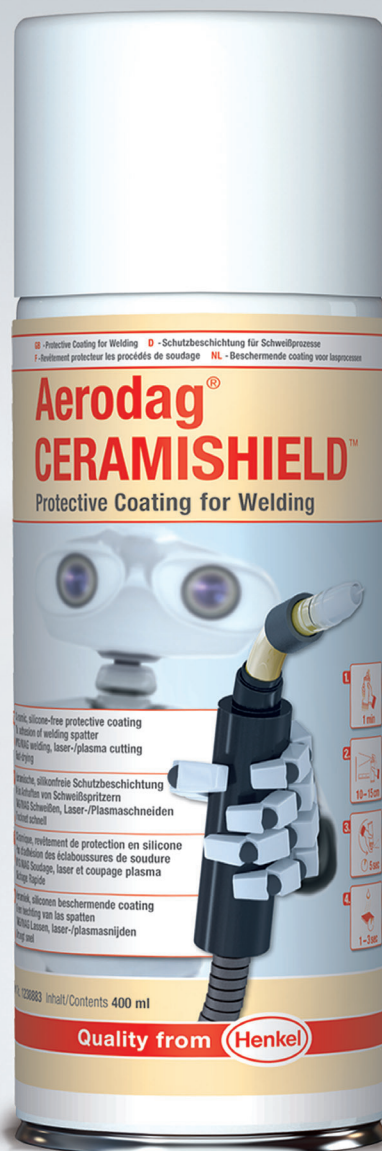

Innovative Protective Coating for Welding Processes

Advantages

- Increase productivity by up to 10 %
- Reduction of running costs for consumables by up to 70 %
- Eliminate costs for cleaning equipment
- Easy to apply
- Excellent adhesion of coating

Product Properties

- Ceramic, silicone-free protective coating
- Spray coating dries within seconds
- Protects contact tips, welding nozzles and jigs
- Costs of the protective coating only a few pence per shift
- Prevents adhesion of welding spatter for many hours with just one application

Higher productivity

- Welding spatter does not adhere to contact tips or shrouds
- Time previously required for cleaning equipment is freed
- Reliable, uninterrupted work processes without downtime

Lower costs

- Physical and thermal protection for welding equipment
- Service life of welding equipment increased by four to five times

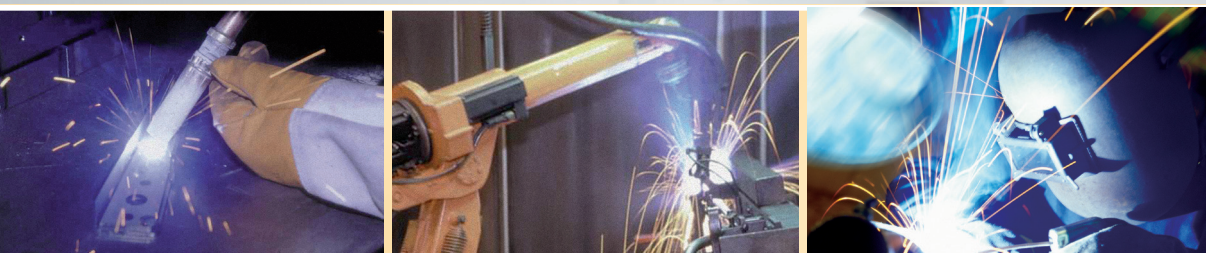

Cleaner welding

- Shroud remains free of spatter – gas flow is not interrupted
- Perfect welding seam

Applications

- Manual/Robotic MIG/MAG welding
- Laser and plasma cutting
- Jigs, fixtures and fittings
