

CEPRO PVC UV-PROTECTION CURTAIN

Description

Cepro Yellow UV protection curtains have a standard width of 140 cm, are provided with a **5 cm seam all around**, 7 suspension eyelets at one 140 cm side and snap-fasteners on both height sides. Thickness 0,40 mm. All standard welding curtains are supplied **incl. 7 steel suspension rings**.

Application

Cepro Yellow UV protective curtains are designed for use in workplaces where bystanders must be protected against UV light.

UV protection curtains offer visual protection against UV light but are not suitable for use as a welding curtain.

Conditions for use

Cepro protection curtains are self-extinguishing and therefore withstand welding sparks. They are, however, not suitable as a welding blanket and do not withstand open fire and intense heat. UV protection curtains offer visual protection against UV light but are not suitable for use as a welding curtain.

Characteristics

Cepro welding curtains are made of PVC.

Dimensions

The following standard dimensions are available:

160 x 140 cm
180 x 140 cm
200 x 140 cm

Made to size curtains are available on request.
