

CEPRO WELDING UMBRELLA 220 CM

Description

CEPRO welding umbrella Ø 220 cm, with tilt mechanism. A carrying bag is included.

Application

CEPRO welding umbrella Ø 220 cm is specially designed for working outdoors. It provides reliable temporary protection of the work site from sun or rain.

The CEPRO welding umbrella is water repellent and can be used in normal weather conditions. We advise to be cautious during extreme weather conditions, like extreme rainfall or very hard wind.

Manufacturers recommendations

- The structure and frame should be checked at regular intervals.
- Regularly check the fabric for tear and/or other damage.
- Replace the umbrella when necessary

Characteristics

The fabric used for the cover is a green canvas 280 gr/m². The fabric is water repellent and flame retardant. The structure is made from steel, painted white. The umbrella is fitted with 10 ribs. The end of the ribs are fitted with caps. For extra security the edge of the fabric is fitted with metal rings.
