

WELDING CUSHION

Description

CEPRO welding cushions are used to prevent injury due to contact with seam welds and / or for a more comfortable working position

Application

The maximum application temperature is 550 °C, shortly up to 600°C.

Conditions for use

- CEPRO recommends the use of multiple layers for maximum protection.
- The temperatures shown are only an indication. The suitability of the selected product should always be tested beforehand.
- Regularly check insulation products for tears and or other damage. Replace damaged blankets where necessary.
- Insulation products can be used for many purposes and therefore, no guarantee can be given on their use. The end user is responsible for determining whether a specific insulation product is suitable for use in a specific situation and whether it offers sufficient protection during the work to be performed.
- CEPRO insulation products are sewn on the cut edges with best quality Kevlar thread.
- All of our insulation products have the following thermal conductivity coefficient per layer of 25mm = 0,044 W/m*K by 100 °C (More technical details are available upon request).

Characteristics

CEPRO welding cushion are built up from several different heat resistant and insulating products

Available dimensions

Welding cushion
50 x 50 cm, thickness 8 cm 57.51.10.05

Welding cushion
100 x 100 cm, thickness 8 cm 57.51.10.10
