

PRODUCT INFORMATION

Black Argon Hose

SUMMARY

The correct and most popular method for the short distance transport of inert shielding gases from the regulator to MIG or TIG welding machines. Made from durable PVC in 6mm or 10mm diameters that can be used with hose tails and appropriate nuts.

FURTHER INFORMATION

- Argon welding hose manufactured to EN 559
- 20 BAR Maximum working pressure.
- Reinforced with high tensile synthetic plies, abrasion and weather resistant outer.
- Available diameters: 6mm or 10mm
- When fitting hose tails and tail nuts it is recommended that the correct hose clips are used, rather than jubilee clips.
- Available by the meter or the coil.

ARTICLES & ACCESSORIES

Part Number	Product Description
BW600BA	6mm Black Hose x 100m
BW1000BA	10mm Black Hose x 50m
BW600BAP	Black Argon Hose per metre
