

PRODUCT INFORMATION

Green PVC Work Shelter Cover

EZTENTTGCOV

SUMMARY

Our Green PVC Cover for Work Shelter Frames is recommended for applications where no external visibility is required. It's matt finish eliminates glare. Our Low Vis Green work shelter gives a high performance in all welding applications and is reinforced for extra strength and tear resistance.

TARGET APPLICATIONS

MIG, TIG, Stick and Gas welding applications.

FURTHER INFORMATION

Measuring 2mtr x 2mtr x 2mtr and suitable for MIG, TIG, Stick and Gas welding applications, our reinforced PVC green work shelters protect the weld and welder from the elements, and passers-by or colleagues from the welding arc and spatter.

Both this type and our durable white coated canvas cover are suitable for a number of other covered, non-welding related operations.

When supported by our strong, lightweight tubular steel frame (available separately), they are fast and easy to erect and can be moved intact. The front can be left open or closed for partial or complete enclosure.

ARTICLES & ACCESSORIES

Part Number	Product Description
EZTENTTGCOV	Green Work Shelter Cover
EZTENTWSFRM	Work Shelter Frame

TECHNICAL SPECIFICATION

Conformity	EN1598*:1998	
Flame Retardant	BS5438, test 2A and 2B	
Material	Dark green, matt finish reinforced PVC	
Cold crack	-6°C	
Burst Strength	825 MIN	
Breaking Load (N/5cm)	L 340 MIN	T 220 MIN
Tongue Tear	L 130 MIN	T 220 MIN
Resistance to Flex Cracking (cycles)	250,000 MIN	
Storage conditions	-5°C to +25°C room temp	
Cleaning	Wash in mild detergent	
Weight	340g/m² (±7.5%)	
Thickness	450 micron nominal
