

PRODUCT INFORMATION

SIF PICKLING PASTE

FXPICK20

SUMMARY

Sif Pickling Paste is a strong, colourless paste applied using a brush to clean discoloration of the surface around the weld area and restore the chrome oxide layer on stainless after welding.

TARGET APPLICATIONS

The use of Sif Pickling Paste arises where a fabrication is too large to fit into a pickling bath or where either the pickling has to be done in situ or where only localised pickling is required, such as on weld seams. The paste can be applied either directly to the weld or following mechanical dressing of the weld, for example by grinding and/or abrasive blasting.

FURTHER INFORMATION

This product is hazardous and must be shipped via special courier service with supporting packaging and documentation. It therefore attracts a HAZCHEM surcharge and must be sold in full sealed-box quantity of 6pcs only. Brush Included. A neutralizer is also available to remove the paste from unwanted areas.

ARTICLES & ACCESSORIES

Part Number	Product Description
FXPICK20	Sif Pickling Paste 2kg Jar
FXPICKNP	Sif Neutralising Paste 2kg jar
FXBRUSH	Flat application brush
EEPBRUSH	Round application brush

TECHNICAL SPECIFICATION

State	Paste
Colour	Colourless
Odour	Odourless
Solubility	Slightly miscible in water
