MODEL 'O' TYPE WELDING TIPS

CCMO01

DESCRIPTION

The Model 'O' type welding tip is used with a Model 'O' type blowpipe in very fine welding and brazing applications, including the fusion welding of thin gauge sheet metal up to 1.5mm (1/16") and delicate lead welding.

FURTHER INFORMATION

The Model 'O' type design has gained popularity in the industry and is favoured for its supreme balance and suitability to delicate tasks that require high accuracy.

Weldability carry a diverse range of oxy-fuel gas cutting and welding equipment including regulators, hoses, flashback arrestors, hose attachments, torches, nozzles and tools.

The tips are available in 5 sizes. To identify the size required for your application, use the Model 'O' Data chart below.
