

PRODUCT INFORMATION

FINE HIDE YELLOW TIG GLOVES

DESCRIPTION

Preferred for their tactility, these yellow TIG gloves are popular among welders as the fine hide design allows easy movement of a TIG rod across the palm whilst providing a comfortable fit.

EAD006

INFORMATION

These high quality, comfortable TIG welders' gloves have been designed with a TIG welder's needs in mind. Their fine hide construction combines high levels of protection with light weight and manoeuvrability. The glove is made so that the welder can easily pass TIG rods through his thumb and index finger, in order to produce a successful weld.

This product is CE approved and conforms to EN407.

NOTES

Weldability provide a full range of gloves, which includes 'Rigger' style gloves (EAD002 – EAD003), fine hide TIG welders' gauntlets (EAD006), lightweight TIG gloves and general purpose gauntlets (EAD000 / EAD000REV).
