CURV-O-MARK PIPE MARKERS

STANDARD
JUMBO

COMBINATION ADAPTOR

PICTURE FILE: EJ07210000-3

PRODUCT DESCRIPTION:

The Curv-O-Mark marker is a compact, time-saving tool used to lay out pipe and structural steel joints. Laterals at any angle, 'T's, 'Y's, 'X's, elbows and any type or size of joint can be quickly and precisely laid out without the need for complicated mathematical formulae or needless waste from "cut and try" methods.

The Contour marker consists of an X-shaped frame, calibrated protractor, a triple-jointed marking arm and a soapstone holder. The holder can also accommodate a felt pen, crayon or pencil.

The frame easily folds into a compact tool that fits into a pocket. It can be used rightside-up or upside-down, depending on the application.

The protractor is calibrated on both sides, one in degrees, the other in rise-inches-per-foot.

The unit comes with a Structural Adaptor designed to simplify the layout of structural joints, including 'I' beams, angles, channels, square tubing and similar shapes.

A larger "Jumbo" version of the Curv-O-Mark marker is also available, for use with larger diameter pipe. Both are made from durable, lightweight aluminium, which makes for low maintenance – requiring only an occasional oiling.

In addition, a Combination Adaptor is available for use with the Standard and Jumbo Curv-O-Mark markers. This adaptor simplifies handling and increases layout capacity, permitting use of all four sides of the marker.

TECHNICAL SPECIFICATIONS:

	Curv-O-Mark Standard Marker	Curv-O-Mark Jumbo Marker
Suitable Pipe Diameter Range:	1½" – 18" (4cm – 45cm)	8" – 48" (20cm – 122cm)

The Combination Adaptor is able to provide layouts on elbows and turns of up to 90°.

NOTES:

WWS stock the complete line of Contour Pipe Fabrication Tools. This diverse range includes the Wrap-A-Round pipe marking guides EJ07200007 – EJ07200031, radius markers EJ07210010 – EJ07210013, centering heads EJ07210005 – EJ07210006, adaptors, accessories and guides.
