PRODUCT DESCRIPTION:

The Jackson Shadow Flip-Front welding helmet range combines cutting-edge technology with comfort and practicality, to give the welder a unit that provides unrivalled protection, a flip-front (4 ¼" x 2") lens-holder, lightweight streamlined design and a variety of wearing options.

The Shadow Flip-Front incorporates 'space-age' thermoplastic material, enabling it to remain lightweight and comfortable, whilst providing protection from impact and radiant heat.

The hard-wearing flip-up mechanism incorporates a positive detent to lock the lens-holder in the up position, until ready to lower for welding.

The Shadow Flip-Front is shipped with all necessary lenses and is available in a choice of four shell colours; black, blue, red and silver.

TECHNICAL SPECIFICATIONS:

- ★ Lightest full-feature helmet in its class
- ★ Streamlined narrow shell for work in tight spaces
- ★ Extended front increases throat protection
- ★ Built-in resistance to impact
- ★ Radiant heat resistance 50% more effective than other thermoplastic shells
- ★ Made of durable injection-moulded thermoplastic resin – high levels of strength and reliability
- ★ Variety of wearing options

NOTES:

The Jackson Shadow Flip-Front helmet is CE approved and meets the requirements of EN 169 and BS 1542.

This product is supplied with all necessary lenses.

WWS also offer Jackson's range of auto-darkening 'EQC' welding helmets and lenses which remove the laborious task of raising and lowering a flip-front lens-holder and increase the viewable area of the helmet. This range includes the Jackson Journeyman (4 ¼" x 2") [EJ07440905] and the Jackson Pro-V (4 ½" x 5 ¼") [EJ07446005].
