EW0002

PRODUCT DESCRIPTIONS

HEAVY DUTY SPRING HANDLE
CHIPPING HAMMER

PICTURE FILE: EW0002

PRODUCT DESCRIPTION:

This chipping hammer is used in the removal of 'Slag' from weld beads, created mainly in MMA welding.

The heavy-duty design and spring handle of this product enable it to provide strength, reliability and a firm grip to the welder.

The spring also provides the benefit of reducing the effects of resonance created when the hammer is struck against a metal surface.

TECHNICAL SPECIFICATIONS:

Overall length: 27cm

Width of chipping head: 17cm

This hammer features a pointed chipping end and a flatter 'chisel' end.

NOTES:

WWS carry a range of chipping hammers, of which this is just one. Other designs include a standard (EW0003) spring-handled version, a wooden-handled version and a solid tubular version.

ALTERNATIVES: Wooden handled (EW0001), Spring-handled (EW0003), Tubular (EW0004)
