PICTURE FILE: EW1625P-EW7095P

PRODUCT DESCRIPTION:

The WWS range of Din Type plugs are used to connect welding cables to the front terminals of an arc welding power source, more commonly by way of a plug-ended cable connected to a panel socket terminal, but sometimes by a socket-ended cable connected to a panel plug (e.g. when connecting some wire-feed units to power sources).

In addition, plug and socket combinations can be used to connect two pieces of cable together to extend the length of a welding cable.

The WWS Din Type plugs are fully insulated with rubber sleeves and incorporate a twist-lock system, which prevents accidental disconnection.

TECHNICAL SPECIFICATIONS:

Available to fit cable of the following cross-sectional diameters:

16-25mm, 35-50mm, 50-70mm, 50-70mm, 70-95mm
(Heavy Duty)

NOTES:

WWS stock a complete range of Din type connectors. This includes a range of sockets, panel plugs and panel sockets to fit cable of cross-sectional diameters of 16-25mm, 35-50mm, 50-70mm and 70-95mm.

ALTERNATIVES: Din Type Panel Plugs EW1625PP & EW3550PP
