PICTURE FILE: EW3550PS

PRODUCT DESCRIPTION:

The WWS range of Din Type panel sockets are used to connect welding cables to the front terminals of an arc welding power source, more commonly by way of a plug-ended cable connected to a panel socket terminal, but sometimes by a socket-ended cable connected to a panel plug (e.g. when connecting some wire-feed units to power sources).

The WWS Din Type panel sockets incorporate a twist-lock system, which prevents accidental disconnection.

TECHNICAL SPECIFICATIONS:

Available to fit cable of the following cross-sectional diameters:

16-25mm, 35-50mm, 50-70mm, 70-95mm

NOTES:

WWS stock a complete range of Din type connectors. This includes a range of sockets, panel plugs and panel sockets to fit cable of cross-sectional diameters of 16-25mm, 35-50mm, 50-70mm and 70-95mm.

ALTERNATIVES: Din Type Sockets EW1625S – EW7595S
