PRODUCT INFORMATION SHEET

ARC WELDING ACCESSORIES

PART NUMBERS

EW35TL
EW50TL

PRODUCT DESCRIPTIONS

TUBULAR LUGS

35MM²
50MM²

PICTURE FILE: EW35TL-50TL

PRODUCT DESCRIPTION:

This product is placed over the end of a welding cable and secured either by soldering it to the core of the welding cable, or by using a special lug crimping tool which clamps the edge of the lug down to grip the cable. The end of the lug is then used to secure, and carry current to or from, a work-return clamp or the front terminals of some (mostly American) arc-welding machines.

This sort of lug can only really successfully be used once.

The knock-on lug is available to fit the 35mm² and 50mm² cable sizes.

TECHNICAL SPECIFICATIONS:

Available to fit cable sizes: 35mm² and 50mm²

NOTES:

WWS also provide a range of re-usable (e.g. EW50RL), knock-on (e.g. EW50KO) and hammer-on (e.g. EW50HO) lugs.

ALTERNATIVES: Hammer-on Lugs (e.g. EW50HO). Knock-on Lugs (e.g. EW50KO). Re-usable Lugs (e.g. EW50RL)
