EW600CC

PRODUCT DESCRIPTIONS

600 AMP SCREW-TYPE EARTH CLAMP

PRODUCT DESCRIPTION:

This product is clamped to the parent metal in MMA, MIG, TIG welding and Plasma Cutting to complete the weld circuit and return current to the power source.

A cable is tied to a lug and fastened by the turn of a fixing screw and bracket. The jaws of the clamp, which feature gripping grooves, are closed and tightened when the handle on the end of the clamp is turned clockwise. The handle is turned anti-clockwise to open the jaws and release the clamp.

This product is drop forged and has a maximum current tolerance of 600 amps. It is therefore ideally suited to heavy duty applications where a clamp of less current rating (e.g. crocodile style) would prove inadequate.

TECHNICAL SPECIFICATIONS:

Maximum current: 600 Amps

Maximum jaw opening distance: 6cm

Weight: approx. 940 grams

NOTES:

WWS also stock 600 Amp earth clamps of an alternative Screw-Type design, WWS part number EW600SC. This product features an insulated rubber handle and high-grip jaws.

In addition, WWS offer two popular Crocodile type earth clamps, one of which has a 200 amp maximum tolerance, and the other 400 amps. These are available under EW200C and EW400C

ALTERNATIVES: 600 Amp 'Screw Type' (EW600SC) and 200 / 400 Amp Crocodile Type (EW200C & EW400C)
