EW600SC

PRODUCT DESCRIPTIONS

600 AMP SCREW-TYPE EARTH CLAMP

PRODUCT DESCRIPTION:

This product is clamped to the parent metal in MMA, MIG, TIG welding and Plasma Cutting to complete the weld circuit and return current to the power source.

A cable is passed into the clamp via the rubber-insulated handle, and fastened by the turn of an allen-key inserted into the arm of the clamp. The jaws of the clamp, which feature gripping grooves, are closed and tightened when the handle on the end of the clamp is turned clockwise. The handle is turned anti-clockwise to open the jaws and release the clamp.

This product has a maximum current tolerance of 600 amps. It is therefore well suited to heavy-duty applications where a clamp of less current rating (e.g. crocodile style) would prove inadequate.

TECHNICAL SPECIFICATIONS:

Maximum current: 600 Amps

Maximum jaw opening distance: 4.5cm

Weight: approx. 820 grams

NOTES:

WWS also stock a 600 Amp earth clamps of an alternative 'WWS 11' Screw-Type design, WWS part number EW600CC. This product is drop-forged and has gripping jaws.

In addition, WWS offer two popular Crocodile type earth clamps, one of which has a 200 amp maximum tolerance, and the other 400 amps. These are available under EW200C and EW400C

ALTERNATIVES: 600 Amp 'WWS 11' Type (EW600SC) and 200/400 Amp Crocodile Type (EW200C & EW400C)
