## PRODUCT INFORMATION SHEET

### INDUSTRIAL PAINT MARKERS

#### PART NUMBERS

MBSW  
MBSY

#### PRODUCT DESCRIPTIONS

##### MARKAL COLD-SURFACE MARKERS

WHITE  
YELLOW

PICTURE FILE: MBSW-MBSY

#### PRODUCT DESCRIPTION:

Markal Cold Surface Markers meet almost all marking requirements and are widely used in the steel and non-ferrous metals industries and for rubber, wet lumber, hardened plastic, etc..

Markal Cold Surface Markers are real solidified paint markers in stick form, combining the long lasting durability of paint with the ease of application of a crayon. Marking any material, surface or texture – rough, smooth, wet, dry, icy, rusty or even oily – these markers dry like paint, with excellent abrasion, fade resistance and weather resistance. They are cleaner and easier to use than a paint and brush method.

Cold Surface Markers are supplied in a cardboard sleeve, and are available from WWS in white or yellow.

#### TECHNICAL SPECIFICATIONS:

Marking Range: -45°C to +65°C

Suitable For: Cold surfaces, including that of steel, non-ferrous metals, rubber, hardened plastic, etc..

Available Colours: White and Yellow.

#### NOTES:

WWS also stock many of the other products in the Markal range, which includes Valve-Action (felt-tip) markers, WWS part numbers MVAW – MVAY, Ball-Paint markers, MBPR – MBPY, and “Thermomelt” temperature indicator sticks, MTS125F/52C – MTS850F/454C.

**ALTERNATIVES:** Markal Valve-Action Markers, MVAW – MVAY  
Markal Ball-Paint Markers, MBPR – MBPY
