Approved

WHY CHOOSE THE PAPR HELMET? ○

With rigorous safety certifications, real-time monitoring, and a design focused on user comfort, the PAPR Helmet provides peace of mind for those in high-risk environments. From long-lasting battery life to easy maintenance, it's crafted to support safety and productivity.

KEY FEATURES & BENEFITS ○

Panoramic Visor

A 180 visor on a helmet offers enhanced peripheral vision, providing a wider field of view compared to traditional visors.

Consistent Clean Airflow

A battery-powered blower pulls in ambient air and filters it to provide continuous, purified airflow that reduces breathing resistance and minimizes fatigue.

Smart Alerts for Safety

Real-time audible and visual alarms notify users if airflow is restricted, the filter needs replacement, or the battery is low, helping always ensure maximum safety.

Extended Battery Life

Built for endurance, the helmet provides up to 10 hours of continuous use on a single charge, with a quick 2.5-hour recharge time.

Ergonomic Comfort

Fully adjustable headgear and a lightweight design reduce neck strain and keep users comfortable, even during extended shifts.

Easy Maintenance

Quick and straightforward filter replacements and easy-to-clean materials make this helmet hassle-free, minimising downtime.

TECHNICAL SPECIFICATIONS ○

Battery Life: Up to 10 hours

Flow Rate: 180-210 l/min

Certification: TH3P R SL under European Standard EN12941
